WORK EXPERIENCE

Senior Software Engineer Manager

AvodahMed

Jun 2024 — Present

Texas, USA (Remote)

- Lead a team of 5 engineers in building scalable healthcare solutions designed to simplify medical billing
- Architected and developed a microservices infrastructure using Docker and Kubernetes, ensuring high scalability and system reliability
- Spearheaded the development of a HIPAA-compliant telehealth platform, enhancing remote patient-doctor interactions
- Optimized backend services, **reducing average response times by 200%** and **improving user satisfaction scores by 40%**
- Implemented CI/CD pipelines using GitHub Actions and built internal automation tools, **reducing manual deployment time by 90%**
- Maintained and modernized legacy code for a healthcare SaaS platform, ensuring ongoing HIPAA compliance
- Collaborated with cross-functional teams across multiple time zones to define requirements and deliver high-quality features on schedule

Software Engineer

Turing.com

Set 2021 — Aug 2022

Palo Alto, CA (Remote)

- Developed and maintained full-stack web applications for various clients using React, Node.js, and MongoDB
- Integrated with CMS platforms via GraphQL APIs for dynamic content management
- Collaborated with globally distributed teams through code reviews and agile processes to ensure software quality and timely delivery

Mid-Level Fullstack Developer

Zoox Smart Data

May 2021 — Set 2021

Rio de Janeiro, Brazil (Remote)

- Built and maintained responsive, user-friendly WordPress websites for clients across various industries
- Developed high-performance landing pages and marketing sites with minimal data payload using HTML, CSS, and JavaScript
- Implemented SEO techniques and mobile-focused performance optimizations, **improving page load speeds by 60%** and a **Lighthouse score 97**

EDUCATION

Pontificia Universidade Católica de Campinas (PUC-Campinas)

Bachelor's of Computer Engineering

Jan 2016 — Dec 2020

Campinas, Brazil

- Relevant Coursework: Data Structures, Program Development, Microprocessors, Linear Algebra, Discrete Mathematics, Systems Architecture, CyberSecurity, Embedded Systems, Operating Systems, Computer Networks, Databases, Software Engineering, Artificial Intelligence

PROJECTS

Personal Invoice Generator

<https://github.com/jpporta/vps-tools>

- Automate tracking of worktime using Apple Shortcuts and REST API hosted on personal homelab
- Generate and send invoices automatically using HTMX, and Apple Shortcuts

Thermal Printer Notes

<https://github.com/jpporta/ticket-control>

- Integrated with specific hardware (thermal printers) to print notes directly from TCP connection
- This project was built using Go and deployed to homelab server
- It required a low-level understanding of TCP and the proprietary protocol used by thermal printers
- Created and implemented custom templates using Typst and Go templates

SKILLS

- **Programming Languages:** JavaScript, Go, Rust, Python, Bash, HTML/CSS, Elixir, C/C++, R, Flutter, Dart

- **Technologies:** React, Astro, Svelte, Tailwind CSS, Git, UNIX, Docker, N8N,AI Agents, NGINX, Amazon Web Services, Google Cloud Platform
